PROFESSIONAL SUMMARY

Multidisciplinary creative and digital marketing professional with experience across graphic design, social content, short-form video, websites, and internal tools. Comfortable learning through experimentation and using AI-assisted tools to explore practical solutions and improve workflows. Combines visual judgement with marketing context to create work that is clear, usable, and relevant to business needs.

CORE CAPABILITIES

- VIBE CODING & WEB: AI-assisted development, Shopify Liquid customisation, landing pages, interface prototyping
- AI & CONTENT: Generative AI, AIGC video, prompt direction, short-form editing, workflow experimentation
- DIGITAL MARKETING: Social content, foundational SEO, campaign support, lead-generation materials, market research
- CREATIVE: Graphic design, art direction, editorial design, branding, visual hierarchy, Canva refinement

PROFESSIONAL EXPERIENCE

Digital Marketing Executive | Ty Innovations Pte Ltd | Apr 2024 - Present

- Plan and produce content for Facebook, Instagram, TikTok, and LinkedIn using design, video, and generative AI tools.
- Create product catalogues, presentations, marketing collateral, landing pages, and sales-support materials.
- Use vibe coding to update websites, customise Shopify templates and Liquid sections, and test interface improvements.
- Produce AIGC-assisted promotional reels, including AI host-led, trend-led, event, and invitation formats.
- Experiment with reusable AI-assisted workflows for content ideation, production, and revision.

Senior Graphic Designer | Star Publishing Pte Ltd | Jan 2018 - Mar 2024

- Designed educational publications, book covers, page layouts, illustrations, and marketing materials for the Singapore education market.
- Worked with editors, production teams, and stakeholders to maintain visual quality and meet publishing deadlines.
- Supported art direction, artwork preparation, print production, and consistency across multiple titles.

Freelance Multimedia & Digital Marketing Projects | Self-Employed / Project-Based

| Jan 2017 - Present

Concurrent project work alongside full-time employment.

- Create promotional videos, social assets, branding materials, landing pages, and portfolio websites for SMEs.
- Work directly with business owners from requirements and content direction through final delivery.
- Built a service landing page with foundational SEO and ad support; the client reported increased appointment enquiries and several fully booked days.

SELECTED PROJECTS

Shopify Website Optimisation | VIBE CODING / SHOPIFY LIQUID

Improved an existing commercial refrigeration storefront through AI-assisted Liquid edits, navigation styling, and layout refinement.

Contribution: Theme and section edits, storefront presentation, troubleshooting, and visual judgement. Scope was customisation within Shopify, not ground-up platform development.

WM Smart Living PIM Cloud Inventory Management | VIBE-CODED INTERNAL TOOL

Created a visual workflow for reviewing product information and stock, building bundles, and estimating profit from configured inputs.

Contribution: Page setup, stock view, bundle workflow, and estimated-profit calculation. Profit is a planning estimate, not final accounting profit.

Service Landing Page to Appointment Enquiries | WEB / SEO / CAMPAIGN SUPPORT

Built a service landing page with clear information, WhatsApp enquiry flow, foundational Google SEO, and small-scale ad support.

Contribution: Page structure, web build, SEO setup, and ad support. Appointment outcomes are presented as client-reported feedback, not independently verified attribution.

AIGC-Assisted Social Reels | SHORT-FORM CONTENT

Produced AI host-led, trend-led meme, event highlight, and promotional invitation videos for social platforms.

Contribution: AIGC workflow where relevant, editing, pacing, captions, and quality control using CapCut / Jianying.

AI Concept to Editable Canva Artwork | AI-ASSISTED DESIGN

Used generative AI for early poster direction, then rebuilt and refined the selected concept as editable Canva artwork.

Contribution: Prompt direction, art direction, typography, hierarchy, branding, and campaign-detail refinement.

Singapore F&B Sales Intelligence Tracker | INDEPENDENT PRODUCT CONCEPT / WIP

Exploring a filterable interface to help sales teams review newly opened or upcoming restaurants, cafes, gelato shops, kopitiam, and food courts.

Contribution: Problem framing, information architecture, research workflow, and MVP scope. Currently a research and prototype project, not a launched live-data product.

ADDITIONAL EXPERIENCE

Graphic Designer | Tomato Advertising (M) Sdn. Bhd. | Sep 2017 - Dec 2017

- Developed branding, advertising artwork, campaign assets, signage, and visual identity materials.
- Translated client requirements into practical visual solutions for startups and established businesses.

EDUCATION

Bachelor's Degree or Equivalent in Advertising | 2017

GCE O Level | 2012

TOOLS & LANGUAGES

Tools: ChatGPT and similar generative AI tools, Shopify Liquid, CapCut, Jianying, Canva, Adobe Photoshop, Illustrator, and InDesign

Languages: English and Chinese
